Self Definition

The endless possibilities in full stack development fascinate me, and I'm excited to keep improving my skills while looking for a company where I can grow and contribute. I'm patient and easy-going, which helps me stay calm through coding challenges, and my experience in different creative and technical fields strengthened my teamwork skills.

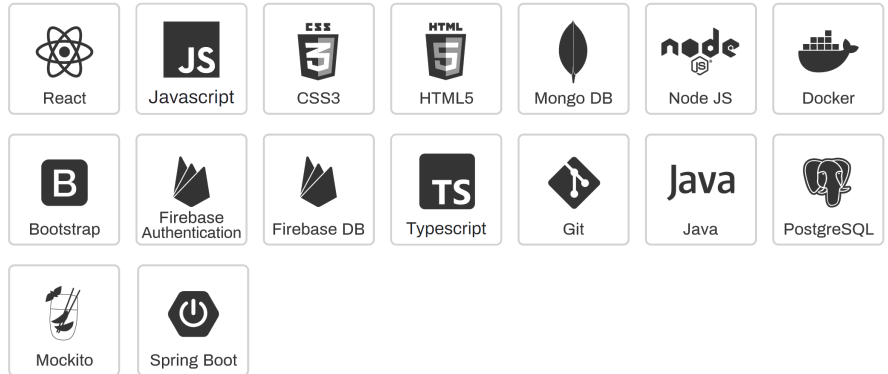

Strength

I like creating user-friendly websites and applications, combining React on the frontend with Java on the backend. Working in different creative fields, including graphic design, taught me to balance visuals with functionality.

Spoken Languages

Hungarian — Native
English — Advanced
German — Basic

Skills

Recent Projects

PSYCHOLOGY WEBSITE

<https://github.com/4rrichard/psychology-website>

Psychology website where you can book appointments with the therapist. After booking a confirmation email is sent and the booked time is disabled. An admin page is implemented where the admin have right to free up cancelled times and upload blog articles. (Technology used: Frontend: React JS, CSS, Backend: Express, Node) The website is still in progress but can be seen at: <https://psychology-website.netlify.app/>

SOLAR WATCH

<https://github.com/4rrichard/solar-watch-app>

I wanted to build a full stack application where users can check sunrise and sunset times for any city, with authentication and role-based access. You can browse as a guest or register to get personalized features. In this project, I focused on learning about REST APIs, Spring Boot, PostgreSQL, Docker, and connecting them with a React frontend using hooks like useState, useEffect, and useContext.

PORTFOLIO PAGE

<https://github.com/4rrichard/portfolio-page>

You can explore my projects and learn more about me through this portfolio website. It was built with React and Vite, focusing on component structure, routing, and responsive design. I practiced working with React hooks like useState and useEffect, and paid attention to creating a clean and modern layout using custom CSS.

Work Experience

Graphic-designer (2019 - 2024) — Koolidea

Supply delivery (2021 - 2022) — Turul Padló Kft.

Photography/graphic-design (2019 - 2020) — Élménypont Kft.

Hostess Coordinator/Office Manager (2018 - 2019) — Inspiration Hostess

Call-center operator (2017 - 2018) — OTP Bank

Education

Full Stack Developer (2024-2025) - CodeCool

Frontend Developer (2022 - 2022) — CodeCool

Graphic Designer (2020 - 2021) — SooterLine

Recreation and Health Promotion Manager (2015 - 2020) — University of Physical Education

Commerce and Marketing (2014 - 2015) — Budapest Business School

High-school graduation/engineering qualification (2008 - 2014) — Újpesti Bilingual Technical School
